Work Experience

Software Developer   Jun-2022 - Aug-2023

Arcgate LCC l Udaipur

1. Software Development: Design, code, test, and debug software applications according to the project requirements, industry best practices, and company coding standards.
2. **Version Control:** Use version control systems (such as Git) to manage source code, collaborate with team members, and ensure code integrity.
3. **Testing:** Develop and execute unit tests, integration tests, and functional tests to ensure the quality and reliability of the software. Identify and fix bugs and issues.
4. System Design: Participate in architectural discussions and create detailed technical designs that outline the structure and components of the software solution.
5. Coding: Write clean, efficient, and maintainable code using appropriate programming languages and technologies. Adhere to coding standards and best practices.

Projects:-

Movie Website Using (API)

Project Description: MoviePulse is a comprehensive online platform that serves as the ultimate movie guide for cinephiles and casual moviegoers alike. This web application provides a seamless and interactive experience for discovering, exploring, and staying up-to-date with the world of movies. With an extensive movie database, intuitive user interface, and real-time updates, MoviePulse revolutionizes how users interact with and enjoy their favorite films.

Technologies Used:

- Frontend: HTML, CSS, JavaScript, jQuery
- Backend: Node.js, Express.js
- API Integration: The Movie Database (TMDb) API

Quiz APP

Project Description: Quiz App is an engaging and interactive quiz application designed to make learning fun and engaging. This web-based application provides users with a platform to test their knowledge on various subjects, ranging from science and history to pop culture and sports. With its user-friendly interface, diverse question sets, and real-time feedback, QuizMaster transforms traditional learning into an enjoyable and informative experience.

Technologies Used:

- Frontend: HTML, CSS, JavaScript, React.js
- Backend: Node.js, Express.js
- Database: MongoDB
- User Authentication: JWT (JSON Web Tokens)

WebScrapping

Project Description: WebScrapeing is a powerful and versatile web scraping tool designed to automate the extraction of data from various websites. This application leverages cutting-edge web scraping techniques to collect, organize, and present information from web pages, eliminating the need for manual data entry and saving valuable time. With an intuitive user interface and customizable scraping options, WebScrapeX empowers users to gather insights, monitor trends, and make informed decisions with up-to-date data.

Technologies Used:

- Programming Language: Javascript
- Libraries: UnderScore_js, Requests, jquery

About Me

I am a skilled Software Developer with a successful stint at Arcgate LLC from June 2022 to August 2023. Proficient in software development, I specialized in designing, coding, testing, and debugging applications, adhering to industry standards. Notable projects include "MoviePulse," a movie guide platform using HTML, CSS, JavaScript, Node.js, and Express.js, and the educational "Quiz App" using React.js, which offers interactive learning experiences. Additionally, I developed a web scraping tool, "WebScraping," employing JavaScript, jQuery, and more. My B.Tech education and expertise in JavaScript, MySQL, MongoDB, Node.js, APIs, and jQuery support my contributions. I'm enthusiastic about efficient, user-friendly software solutions.

Education

B.Tech

University/College Details

Rajasthan Technical University,Kota

2012 - 2016

12th

SN Sinha College ,Warisaliganj
2006 - 2008

10th

National High School ,Mafi
2006 - 2008

Skills

- Node Js
- Javascript
- Jquery
- Mongodb
- API
- MySQL
